

## TROUBLE-FREE DOOR SECURITY

### New 'Mini-TV' Door Viewer Brings Peace of Mind

An innovative new door security product – the **Digital Door Viewer™** allows you to see who's outside by pushing the button to get a full-colour digital view outside. The **DDV** is fitted inside the front door and needs no wiring. It can be easily installed by the average DIY-er and uses only tools found in most homes.

Photo shows: The **DDV** press once

Once fitted, the battery-operated **DDV** works by simply pressing a button on the device to show a large, clear view outside on the 'mini-TV' screen. The digital camera inside the DDV uses a tiny 14 mm hole in the door positioned at comfortable eye-level that, from the outside, looks similar to the conventional 'spy-hole'. The **Digital Door Viewer™** is a big advance on this by replacing the limited image seen through the conventional 'spy-hole' with a wide, full-colour high quality LCD display.

The Police recommendation on their official website [www.securedbydesign.com](http://www.securedbydesign.com) advises "If you don't have a window in the door or some other way of checking who is calling, fit a door viewer. Look through this to identify callers before you open the door."

Photo shows: The **DDV** is easy to install on a front or back door.

The **DDV** measures 140mm high by 216mm wide and 25mm deep in a neat silver tone frame. Eight AA batteries are required. The display is 82mm high x 109mm wide.

Price: £435.00

The **DDV** is available from R & D Marketing Limited, well-known for their *demista*<sup>™</sup> heated mirror pads and bathroom cabinets and *Cosyfloor*<sup>™</sup> electric underfloor heating systems.
