

WHY GET STEAMED UP?

En-suite shower or bathrooms are becoming more and more common today, so why have a view of a steamed up mirror from your bedroom when this can easily be avoided by installing a **demista™** heated mirror pad. These easy to install self adhesive pads are available in a variety of sizes, or for larger areas, several pads can be used to cover the mirrored area.

Photo shows: steam free mirror in en-suite bathroom

Installation is simple; it may be either connected into the bathroom lighting or to a separate switch if preferred. Prices start at £26.90 for a 150x274cm pad and the running costs are minimal, at just 1p for 32 hours. No maintenance is required and the mirror will remain free of condensation forever. Approved to all required standards.

SELF ADHESIVE-
To be placed on back of mirror
